Welcome to the US Army Traffic Safety Training Program Registration System

This site provides on-line registration and management of traffic safety training courses for the Army Traffic Safety Training Program (ATSTP).

Soldiers and civilian personnel

You can view course calendars to see what courses are being offered at garrisons in your local area, and register for courses electronically. To view available courses, click the link below and select a garrison from the drop down menu. Then, use the second drop-down menu to select the types of courses you are looking for. For additional information, click on the Help button above to view the AIRS user guide.

[View Available Courses](#)

Click on "View Available Courses"

Course Administrators

You can select the Admin function to enter new courses or edit course information on the AIRs calendar. Course administrators need to log in with a username and password provided by the IMCOM Safety Office. Once courses are posted on the calendar, the system allows students to register electronically, and automatically forwards registrations to the course administrators for processing. Course administrators can also use AIRs to generate reports detailing the number of students registering, unit information, cancellations, completions, and no-shows. For a detailed information on all the administrative functions offered by AIRs, click on the Help button above to view the AIRs user guide.
